Achillea 'Moonshine' Moonshine Yarrow

Long, straight stems with pale yellow flowers are striking on the mats of green to gray-green leaves of this plant, which are flatter and less divided than those of the *Achillea millefolium*. This Yarrow propagates easily from rooted cuttings or divisions which should be performed in the early spring or fall. Following bloom, one should dead head the plant and divide the clumps when it appears crowded. Introduced by Alan Bloom in the 1950's.

ANATOMY

PLANT TYPE
 Perennial

FLOWER COLOR
 Yellow

BARK COLOR
 n/a

HEIGHT RANGE
 1-3'

FLOWER SEASON
 Spring, Summer

FRUIT COLOR
 n/a

WIDTH RANGE
