Artemisia californica 'Canyon Gray'

Coastal Sagebrush

This reliable shrub, typically used as a groundcover, can reach 1-2 feet tall but can spread up to 10 feet wide. It has gray green, finely divided leaves that are threadlike. Very aromatic when foliage is crushed. It does well in coastal areas with full sun. It does best with afternoon shade in warm, inland areas. This groundcover tolerates clay or sandy soil but needs well draining soil. Flowers are inconspicuous. This is a great plant for dry slopes.
