 CONTAINER

***Leymus condensatus* 'Canyon Prince'**  
 Canyon Prince Wild Rye

One of the best known and utilized native grass selections in Southern California, this beautiful, blue gray foliage spreads out 3'-4' or more. It will reach a height of 2'-3'. It rarely flowers. It does spread by rhizomes but it is not overly aggressive. It can be extremely drought tolerant and care must be taken not to over water this species as it can rot from the center. Otherwise, it is carefree and requires virtually no maintenance.

# Leymus condensatus 'Canyon Prince' | Canyon Prince Wild Rye

## CULTURE & DESIGN

### SUN

Full, Half

### ACCENTING FEATURES

Unusual Foliage

### SEASONAL INTEREST

Year Round

### WATER

Very Low

### SOIL TYPE

Sandy, Clay, Loam,  
Rocky, Unparticular

### LOCATION USES

Background, Perennial  
Border, Shrub Border,  
Raised Planter, With  
Rocks

### GROWTH RATE

Fast

### ADVERSE FACTORS

n/a
