

INCENTIVES FOR ON-SITE RECYCLED WATER CONVERSIONS

HOW

- The Program works on a first-come, first-served basis. Applications are available online at bewaterwise.com® beginning July 1, 2016.
- Applications will be accepted until funding for this program is exhausted.
- Projects with multiple sites require separate applications.
- Once an application is reviewed and approved, applicants will receive a confirmation e-mail along with a list of deadlines that must be met to qualify for funding.
- Incentive payments are made when all invoices and eligible costs are verified, and the connection and use of recycled water becomes operational.

WHY

California is facing unprecedented dry conditions. Your help is needed. Metropolitan has expanded its local resource incentive programs to make saving water more affordable.

WHAT

Metropolitan's On-site Retrofit Program provides financial incentives directly to public or private property owners to convert potable irrigation or industrial water systems to recycled water. Incentives of up to \$195 per acre-foot for five years of estimated water use are available, with a cap at the actual retrofit costs. Items eligible for incentives include:

- Project design
- Permitting
- Construction costs associated with the retrofit of potable to recycled water systems
- Connection fees
- Required recycled water signage

WHEN

Once the application is approved, construction must begin within three months, recycled water service must be operational within seven months and invoices must be submitted within nine months from the date of approval. Reserved funds may be withdrawn for projects that do not meet all deadlines. If a project is disqualified, applicants may re-apply as long as the project is not under construction.
